

Protecting your health starts with your smile.

YOUR BITE AND YOUR HEALTH

People sometimes think that orthodontic treatments like clear aligners are purely cosmetic.

The truth is that malocclusion (misaligned teeth) can lead to chipped teeth, breathing problems, speech issues, and more.

CANDID CAN FIX MALOCCLUSION

If your teeth are visibly misaligned, or your bite causes you pain, you may want to consider Candid clear aligner treatment.

If you're curious about straightening your teeth with Candid, just ask your doctor during your appointment.

If you're a candidate, your doctor may be able to get you started as soon as today.

CANDID

A straighter smile for your long-term health.

MKT-0002 rev. 0 Candid - A Straighter Smile

Leading clear aligner technology

Candid stands out from other clear aligner treatments by investing in the latest manufacturing and materials technology.

The results speak for themselves: clinically excellent finishes, enhanced comfort and convenience, and happy patients.

UNMATCHED DETAIL

Top-quality Carbon 3D printers are Candid's secret to producing comfortable, accurate, snug-fitting aligners.

Because Candid aligners are so accurate, they can move teeth without relying on tools like rubber bands and attachments which make aligners more visible.

DURABLE DESIGN

Candid clear aligners are made from a highly technical plastic that applies a consistent, gentle force over time.

Other clear aligners apply more—potentially painful—force at the beginning but lose strength quickly.

Candid Aligners vs. Other Aligners

DAYS OF WEAR

- Candid aligners maintain a consistently comfortable level of force.
- Other aligners apply more force early on but quickly lose strength.

Paying for clear aligners

01 FINANCING

Many dental offices offer financing opportunities for orthodontic treatment. Your doctor can help you find the right plan for your budget.

02 ORTHODONTIC INSURANCE

If you have orthodontic coverage, you could stand to save big on your Candid treatment. Your doctor will be happy to see if this is an option for you.

03 HSA AND FSA

If you pay into an HSA or FSA as part of your health insurance, you can put those dollars toward your new smile. Keep in mind that your FSA dollars will expire by the end of the calendar year.

Treatment overview

If your dentist thinks Candid is right for you, here's what you can expect:

DIAGNOSTICS

Your dentist will take all of the records necessary for evaluation.

TREATMENT PLAN

Your dentist will develop a treatment plan just for you.

ALIGNER KIT

Candid will produce and ship your aligners to you or your dentist.

WEARING ALIGNERS

You'll wear your aligner steps sequentially for 22 hours every day.

CANDIDMONITORING™

You'll use your smartphone to submit progress scans to your dentist.

RETAINERS

Once treatment has ended, you'll wear a retainer at night to maintain your new smile.
